Bee on Budget (BOB)
Installation Guide for Windows 11
Version <1.0>

Innhold

Introduction

Welcome to the installation guide for Bee on Budget on Windows 11, if you are using another version of windows example windows 10, or older. will your screen look different than in this guide. This guide will take you through the installation of the application from a compressed file to where the application is running on your computer, and it is ready to be used.
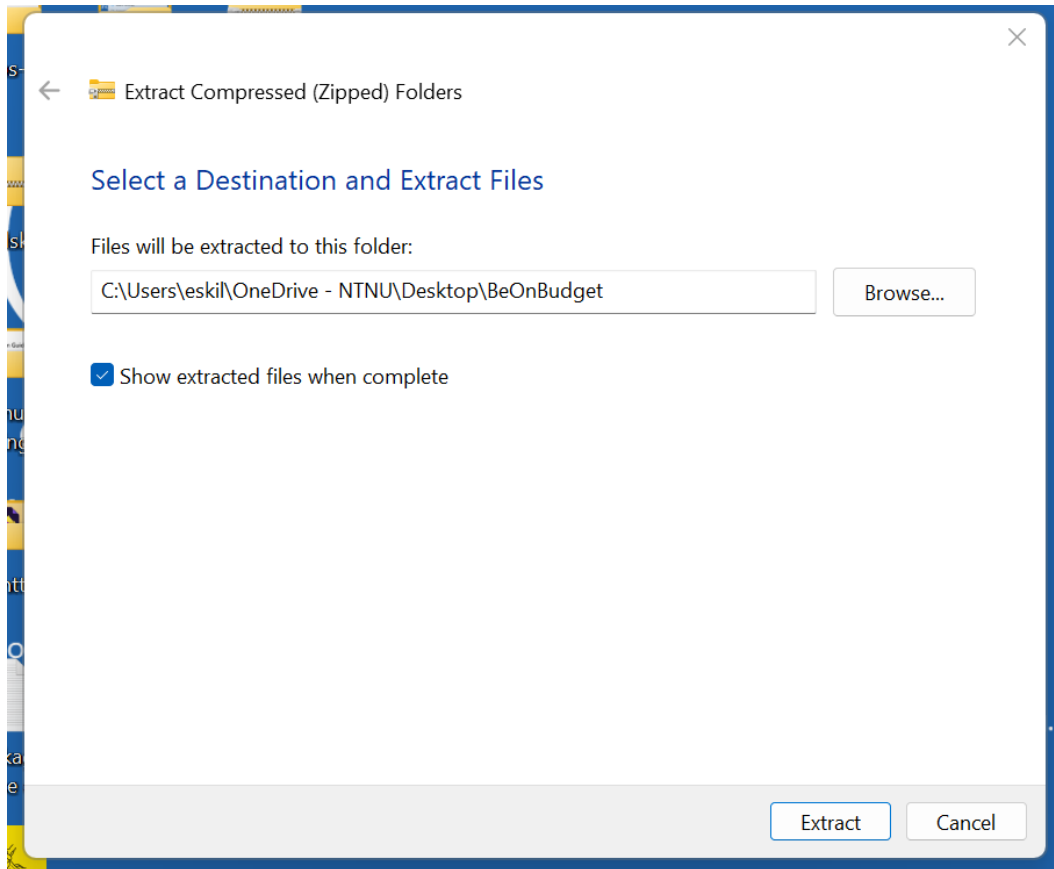

Step 1, Extract the file.

The first step is to locate the compressed file on your computer.
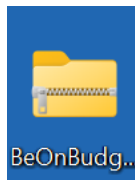

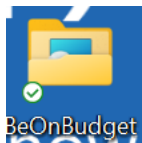

Then right click the file. And press Extract All…
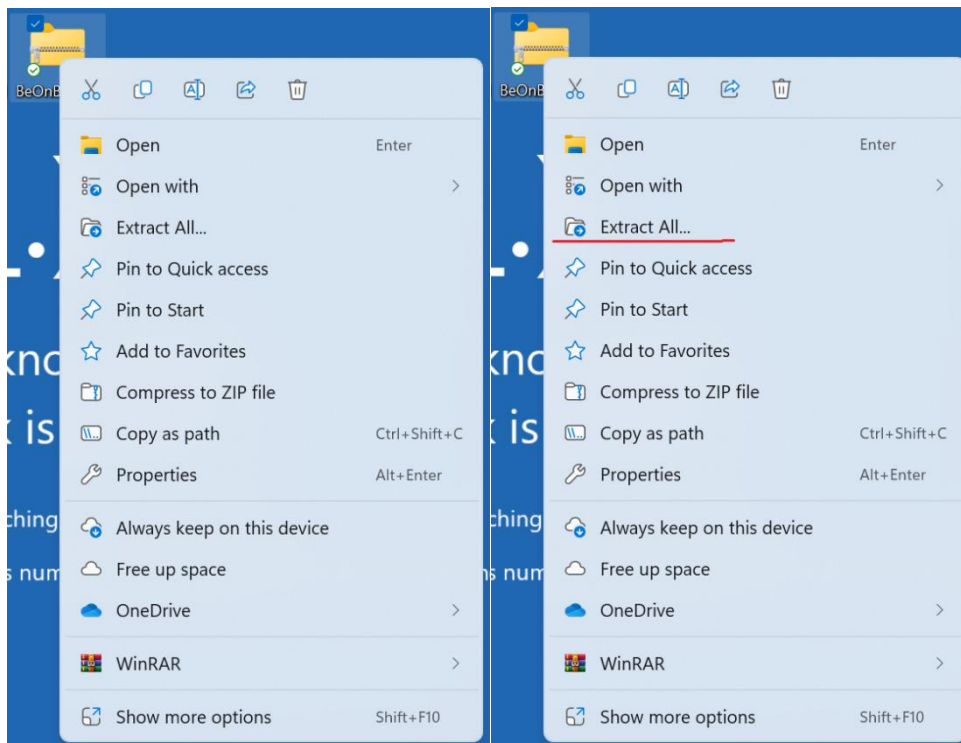

This will open the extraction window for compressed files.

Here you can choose where to un-compress the file, for simplicity's sake will we choose the default, that is usually where the compressed file is already located.

You are now done with step one and the uncompressed file should be located on the same folder your compressed file is.
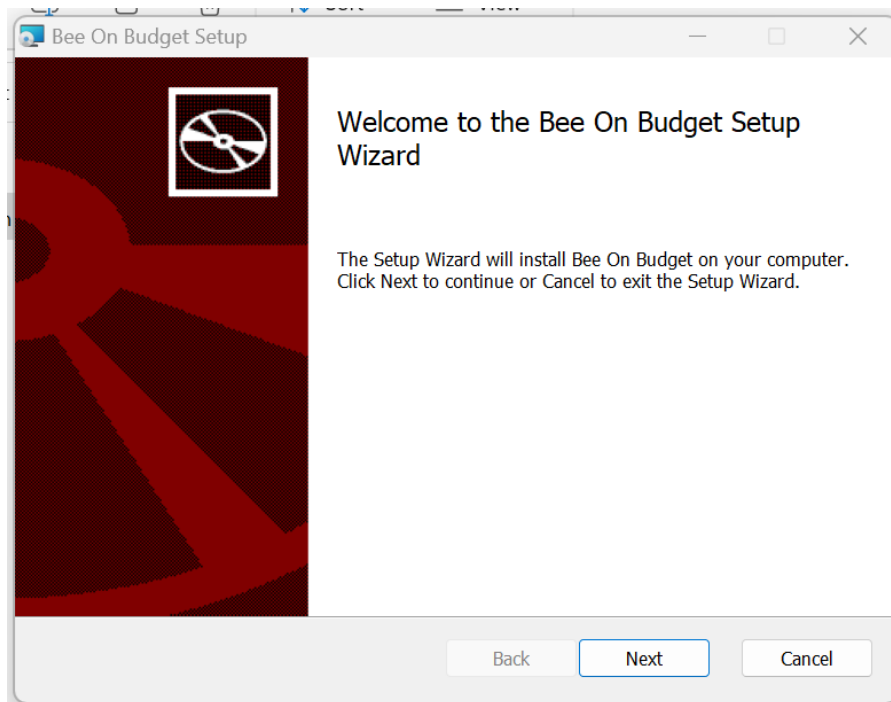

Step 2, Download the application.

open the folder and locate the msi file.
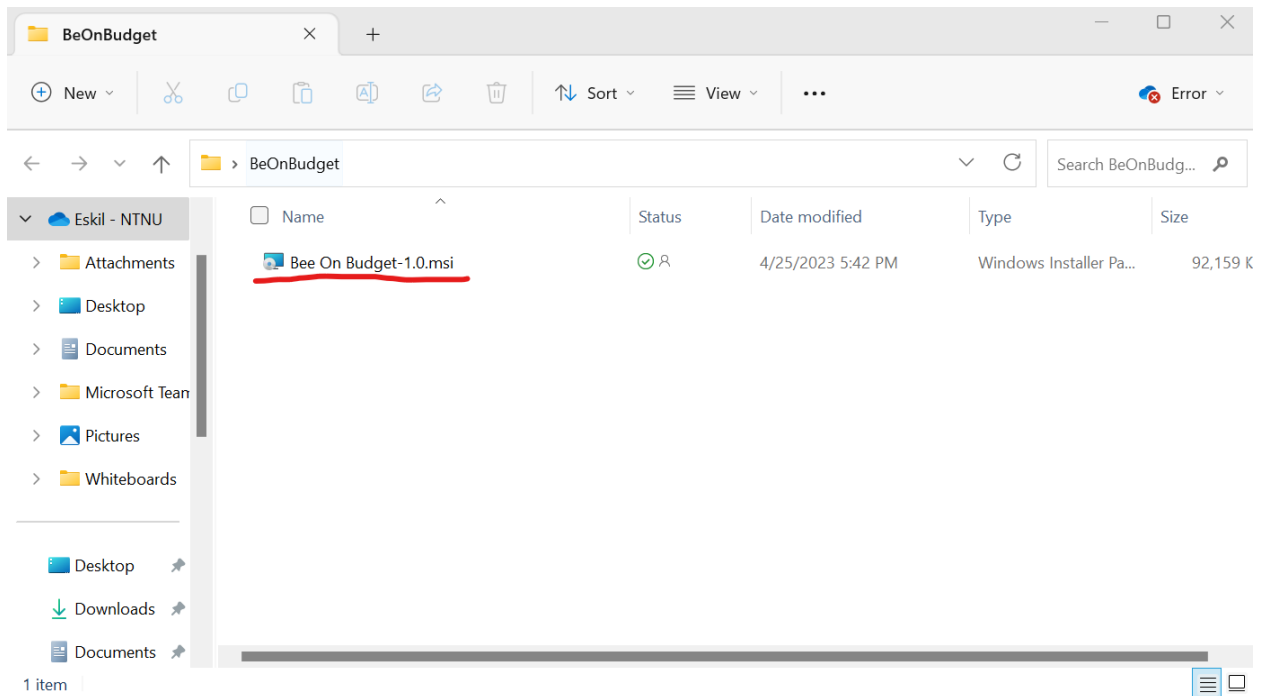

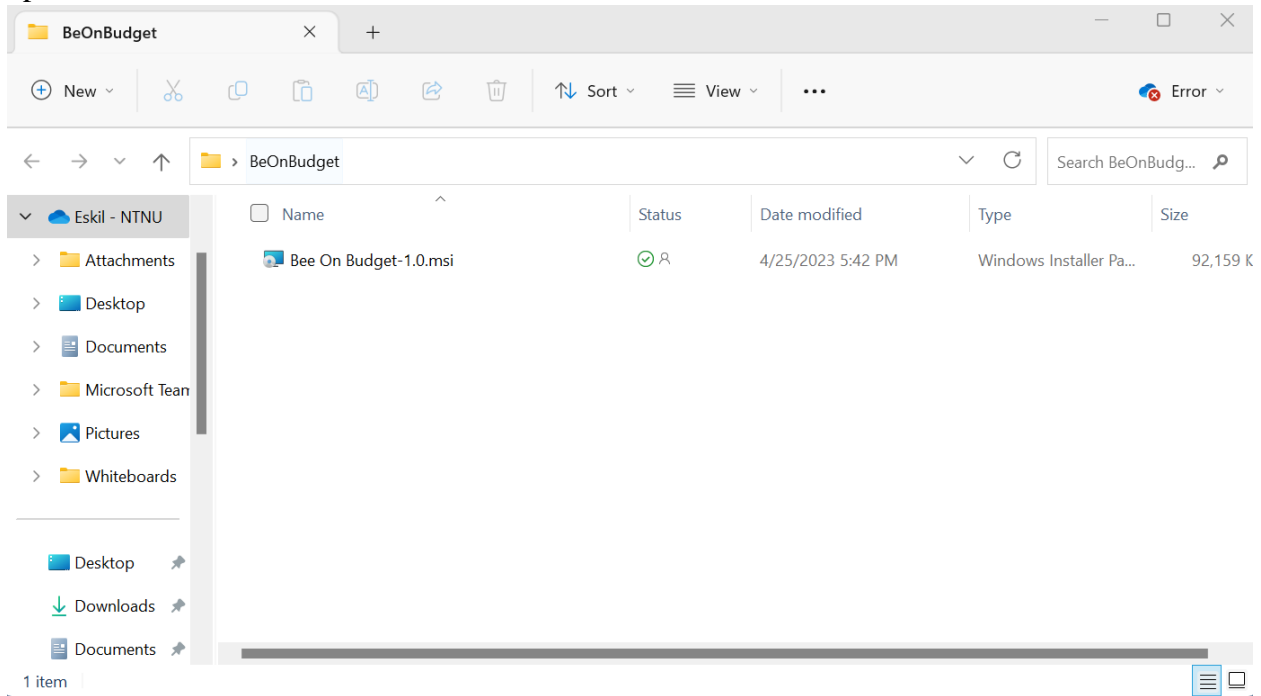

In this Guide it's called Bee on Budget1-0.msi.

DoubleClick on the file and the installation wizard will start.

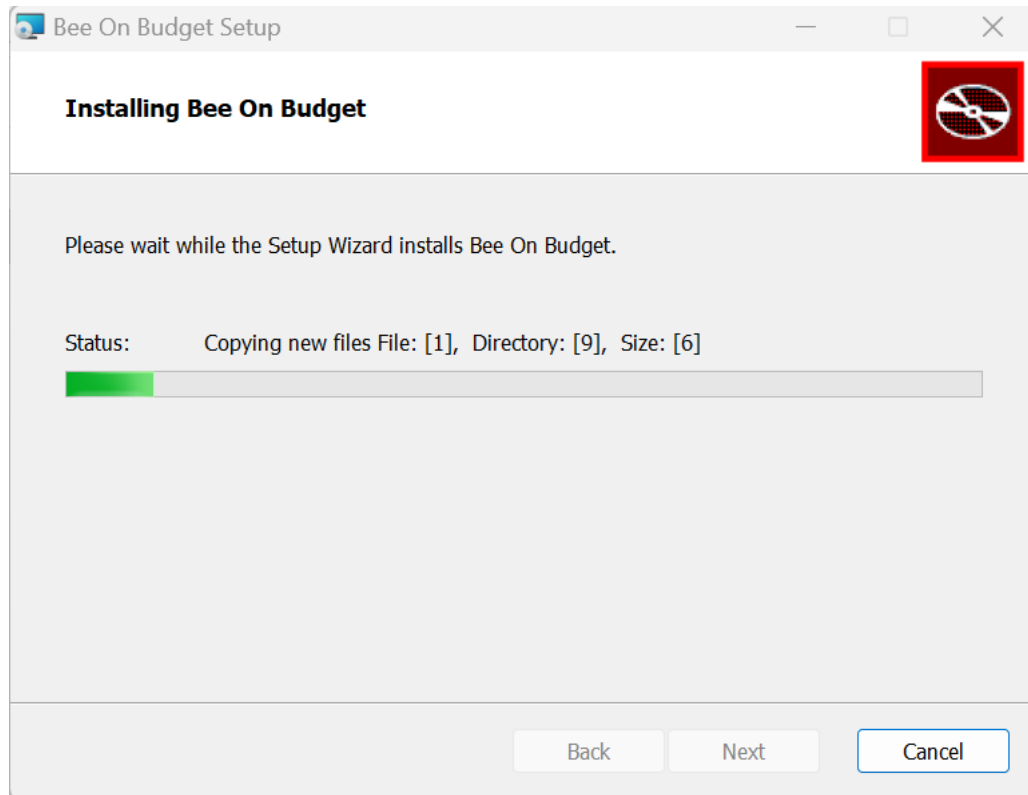

In This step you press Next.

In this window you chose where to install the Application, for the sake of simplicity's sake will we keep it as default. Then press next.
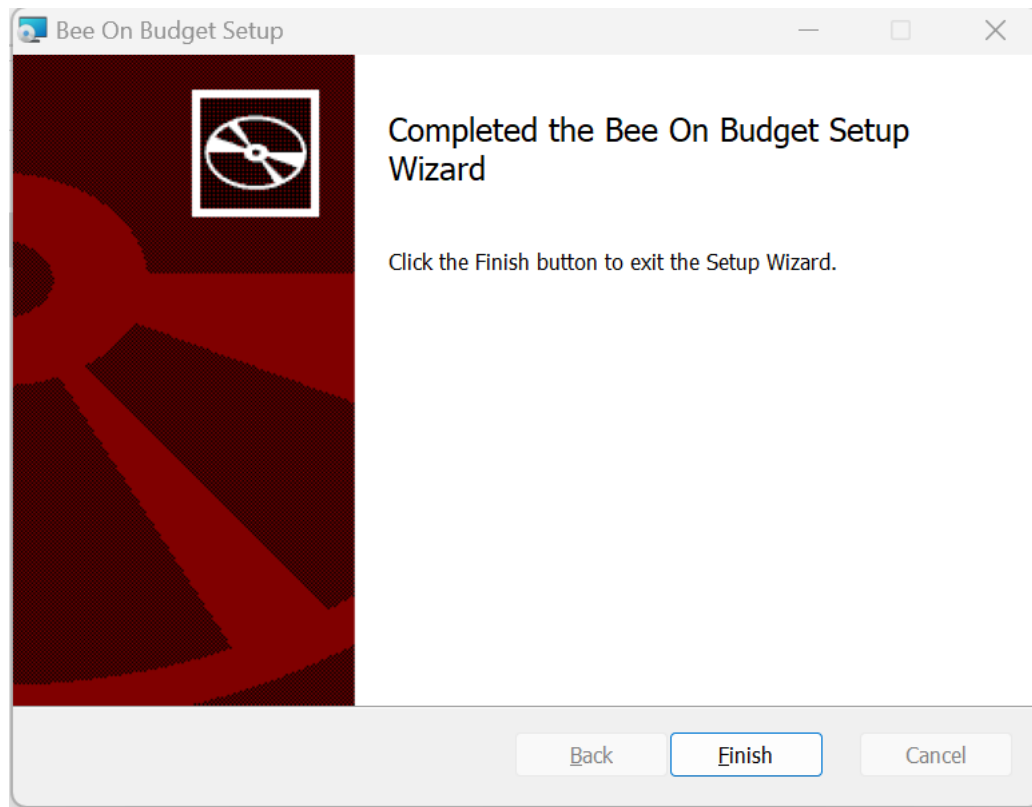

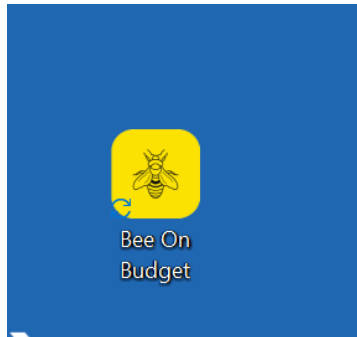

The installation is ready, press Install.

The installation will start.

When the installation is finished you press Finish.

Step 3, Run the Application.

When the Application is finished you have a new icon on your desktop, Double click on the application and the application will start.

Application has started. This is the end of the installation guide for Be on Budget.
